

# Monitor soil moisture for better management decisions

Observant Soil Moisture Monitoring Solution

Optimise crop performance  
by monitoring and  
understanding soil moisture.

View continuous soil moisture  
and soil temperature data live  
from your web enabled device.

Learn how your crop uses  
water and how effective  
rain and irrigation is.

# Observant Soil Moisture Monitoring Solution

## Access your soil moisture data from anywhere

The Observant soil moisture monitoring solution provides users with continuous information from which to make informed decisions. This innovative product provides you with robust hardware that allows remote monitoring of soil moisture and soil temperature at multiple depths in your soil profile. Remote access to the information from Global software application from any internet enabled device.

### Summary root zone moisture levels

### Separate Level soil moisture

Observant Global™ images are for illustrative purposes only

- 1 EnviroPro® probe**  
Monitors soil moisture and temperature every 10cm for a range of probe lengths.
- 2 Quick summary**  
Viewable on your smartphone or tablet, or more detailed analysis on your Observant Global™ page.
- 3 Highly accurate monitoring**  
Shows how the crop is using moisture through the soil profile.
- 4 Frequent checks and updates**  
Monitor soil moisture and temperature, with historical data displayed and data export capability.

## Hardware

### Important information

Observant has a range of probes and probe lengths (40cm, 80cm, 120cm and 160cm) as well as different cable lengths for different crop needs. As the kit is solar powered ensure it's exposed to direct sunlight most of the day. Additional sensors can be connected to the C3 including rain gauge, temperature and relative humidity or weather station.

Contact your authorised Observant agronomic dealer who can tailor a solution that accurately monitors your soil moisture, temperature, and other data you need to measure.
