

OBSERVANT™

Introducing The Solo+

Your Solution for Remote Monitoring and Precision Control

Why Choose The Solo+

The Solo+ stands out as Observant's new stand-alone, low-cost, and robust platform tailored for remote monitoring and single-point, low-power control applications.

Key Benefits

Cost-Effective

Enjoy reduced costs of ownership without compromising on functionality.

Remote Diagnostics

Robust health reporting and remote diagnostics for peace of mind.

Versatility

Solo+ supports both Observant and third-party sensors and control devices, offering a comprehensive solution.

4G/5G Compatibility

Stay connected with the latest communication standards.

Combined Monitoring and Control

All-in-one device for your monitoring and control operations.

Integrated Platforms

Connect seamlessly with Observant Global™ and Jain Logic™ for enhanced functionality.

Future-Proof

Modular design with replaceable modem and battery, ensuring longevity and adaptability.

The Solo+ is designed to give you more control, empowering you to make better-informed decisions and increase on-farm productivity.

Increase On-Farm Productivity

- Up-to-date Data**
Access accurate data about water and infrastructure in real-time.
- Alerts and Notifications**
Receive timely alerts and notifications for critical events.
- Remote Water Management**
Effectively manage water across multiple sites and properties, even over vast distances.
- Reporting**
Share data and reports effortlessly with stakeholders, employees, or service providers.
- Trend Analysis**
Track trends in water use, soil moisture, and weather patterns for strategic planning.

About OBSERVANT™

With over two decades in the Australian AgTech industry, Observant is dedicated to providing smart water monitoring and control solutions for the country's pastoral, cropping and horticulture markets. Observant's premium range of products comes with an industry-leading warranty, providing farmers with the most reliable, easy-to-use, and practical tools to navigate the challenges of water management.

Use Cases

The Solo+ offers versatile solutions tailored to your specific needs. Choose the Solo+ to connect to up to two sensors, whether it's for:

Remote Tank Water Management

Keep an eye on your tank water levels at all times and get alerts whenever a threshold is breached. Configure simple automation to refill your tank whenever it empties, and save on time and travel costs.

Solo+

Monitor your farm remotely

with a rugged camera, weather station, soil probes, rain gauge, water level, flow or pressure sensors to give you peace of mind that you know what's happening around your farm at any given time.
